

White Papers

frevvo delivers cloud-based e-forms and workflow simplified. Existing paper forms and workflows are wasteful and stifle productivity. Replacing them with fully automated e-forms and workflows increases productivity and drives down costs.

Live Forms enables business user to easily create e-forms and workflows so programmers can focus on other tasks. Customize our pre-built forms and workflows to fit your business or design your own. Business users will find our intuitive, drag-and-drop 100% web-based interface easy to use.

Forms are designed once and are automatically accessible from desktop browsers, tablets and smart phone devices. Your users will benefit from a consistent experience with 24x7 access from any device.

Live Forms integrates with databases and internal systems, export PDF documents like Government W-4s, supports live task notifications, digital and wet signature capture, reports on data and available in both public and private on-premise cloud-based installations.

The white paper library discusses key product features and solutions.
