

Manage Templates

Form and control templates are managed by the Live Forms tenant admin. Forms can be published as templates by the tenant admin or by any user in the tenant but only the tenant admin can permanently remove templates from the database or add them to the New Forms Wizard. Template menu items are only accessible if you are logged into Live Forms.

On This Page:

- Manage Form Templates
- Manage Control Templates

Manage Form Templates

Form Templates can be permanently removed from the database or added to the new form wizard which appears every time you create a new form by clicking the

icon on the [Forms Home Page](#). Login as the tenant admin. Click **Manage Form Templates** or **Home** then **Templates** on the left sidebar. You can locate your published templates by clicking on **Forms by Category** or **Forms by Tag**.

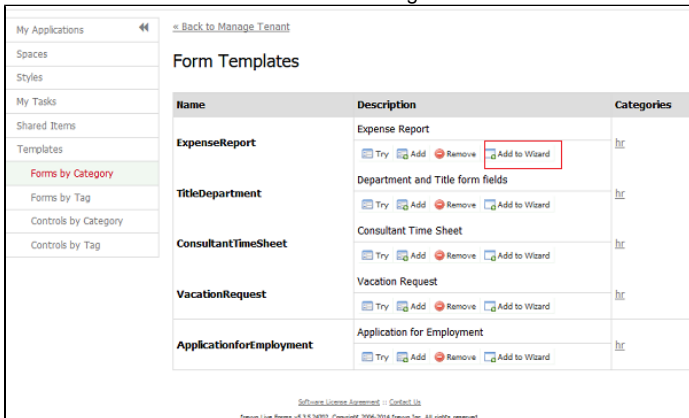

Click on the category or tag to display the list of published forms. Click the

icon to remove the form template from the database. If the published form is not added to the New Form Wizard, clicking the

icon will add it. Notice **Add to Wizard** changes to **Remove from Wizard**. Click this to remove the form template from the wizard.

Template

Please select a template. Your new form will be initially created with fields from the selected template.

Finish

Manage Control Templates

Control Templates, added by designers in a tenant, can be deleted from the database by the tenant admin. Click **Manage Control Templates** on the tenant admin page or navigate to **Templates > Controls by Category** or **Templates > Controls by Tags** on the tenant admin Home page. There you will see the list of published controls and can remove them one by one.
