

# Data API Client Libraries Releases

This page contains the compatibility release matrix for the Live Forms Data API .Net and Java Client Libraries. Each Live Forms server version requires that you download and use the matching compatible client libraries.

We strongly recommend that you always use the latest version of the frevvo data API client libraries.

- To use the latest client library version you also MUST upgrade to the compatible latest Live Forms server version. Make sure you keep the compatible version in sync.
- The Java Client Library is part of the Live Forms In-house download. Click [here](#) to download the latest tomcat bundle. The library files are located in the `<installdrive>\frevvo\ext\client` directory.
- The latest version of the Data API .Net Client library can be downloaded by clicking the appropriate version link in the table Release Compatibility table below.

Click the Library Version link in the matrix below to download previous versions of the Data API.Net Client Library.

Live Forms Server Version	.NET Client Library Version	Java Client Library Version
v7.2.1 - v7.4.x	<a href="#">v7.2.1</a>	Latest include in In-house server download
