

Filesystem Connector Release Notes

This page contains the compatibility release matrix supported for the Live Forms Filesystem Connector.

frevvio Filesystem Connector Version	Live Forms Server Version
v1.1.1 ¹	v7.4.0+
v1.1.0	v7.3.2+
v1.0.1	v6.2.4+
v1.0	v6.2.4+

1. In order to run the Filesystem Connector v1.1.1 you must upgrade to the Official GA Release of Live Forms v7.4.x for in-house customers. The in-house version was released on 2/14/18. FSC v1.1.1 was not certified with earlier Live Forms versions.

frevvio only supports/certifies the Filesystem Connector running in the Apache Tomcat container.

- v1.1.1 (r31126)
- v1.1.0 (r30932)
- v1.0.1 (r28403)
- v1.0.0 (r27578)

v1.1.1 (r31126)

Version 1.1.1 of the Filesystem is a small patch release that contains enhancements for frevvio internal use. This version of the connector was certified with Live Forms v7.4+. We suggest that Cloud customers running the Filesystem Connector on premise upgrade to this version to meet the compatibility requirements. You can download it from our [frevvio Software Downloads Directory](#).

It is recommended that In-house customers upgrade to Live Forms v7.4.x to be compatible with v1.1.1 of the Filesystem Connector. v7.4 was released for in-house customers on 2/14/18.

Enhancements:

#21856 - Add support for JAVA_OPTS in standalone file-connector for docker images

#21873 - Serve management endpoints on 8083 for the frevvio Cloud

v1.1.0 (r30932)

10/6/2017

Version 1.1.0 contains two logging enhancements.

Enhancements:

- #21555 - The Filesystem Connector logging entries are captured in a separate logfile in <frevvio-home>\tomcat\logs.
- #21644 - Ability to log messages in JSON format

v1.0.1 (r28403)

7/22/2016

Version 1.0.1 of the Filesystem Connector is a bug fix release.

Tickets Fixed:

#19723 - Stripping the prefix from the query parameter does not remove all of the prefix characters.

v1.0.0 (r27578)

Initial GA Release.

Tickets Fixed:

- #18973 - File Connector UTF compliance
