

_Icons

Attached to this page are commonly-used icons in the frevvo documentation.

Note to documentation authors

Use the icon images attached to this page, rather than attaching them to each individual page. That will make it easier to update the documentation if the frevvo UI changes.

You can insert the icons directly into a page — there's no need to attach them to the page itself. Here's an example of how to do that:

```
!_Icons^myIcon.png!
```

Alternatively... click the Insert->Images and select "Search" and enter the name of the image you looking for. Double click the image found by the search to add it to your page.
